GUI PRO

SURVIVAL CLEAN

01 Package description

- The maximum supported resolution is **2560 x 1440**
- It is **optimized for mobile.**
- The font was created with **TextMeshProUGUI BitMapFont** and the font used in the demo scene is free font.
- Sprite images come in their original sizes.
- Function icons come in a variety of sizes (x2), and for item icons, they come in multipliers of their original size and 2.
- The sample project is still unfinished and will continue to be updated in the future.

02 Basic Setup

### 1. GameView Resolution Setting

If you set it to the desired resolution in the game view, you can preview it.

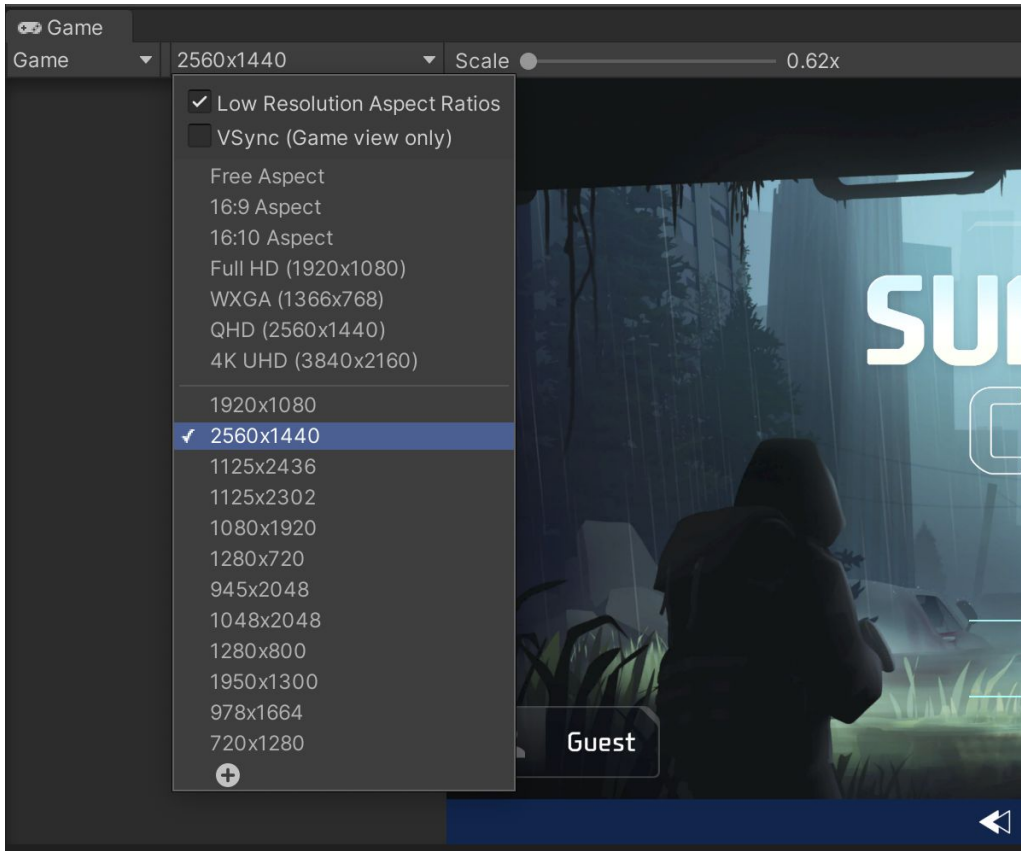

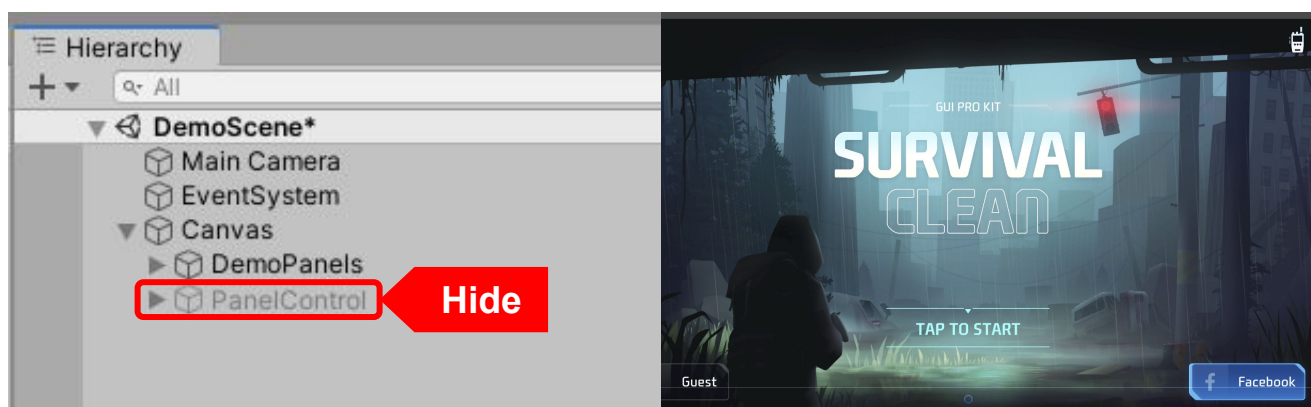

2. Canvas Scaler Settings
There is PanelControl in the demo scene.

You can hide it or make it visible, so adjust it according to your convenience.
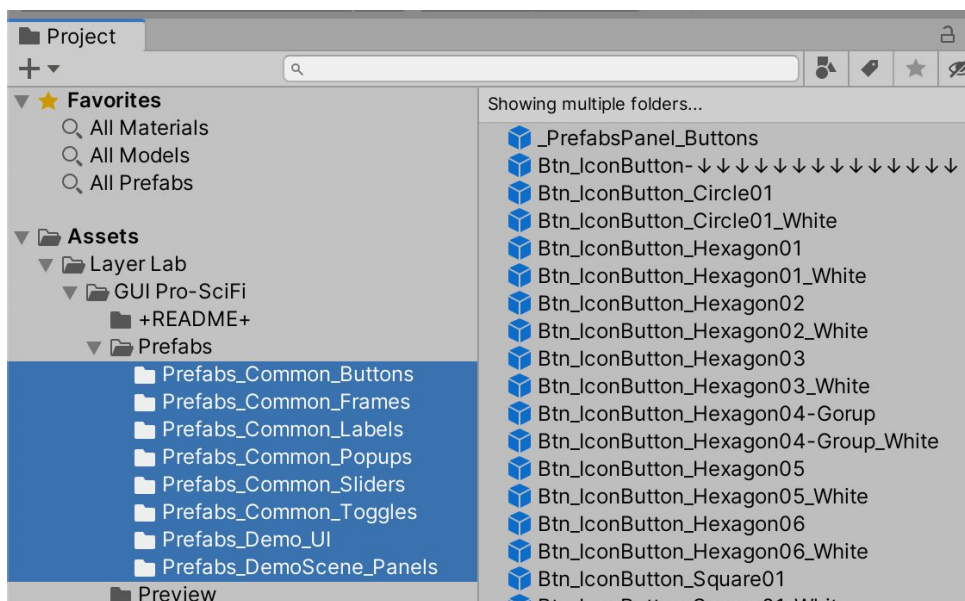

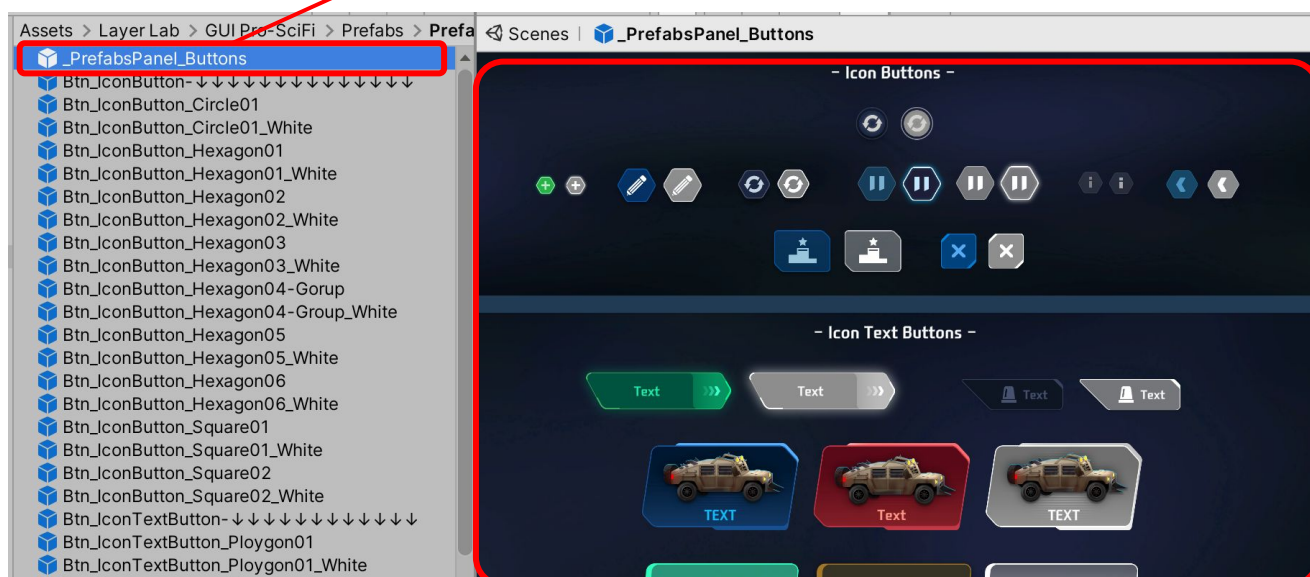

04 Prefabs

All UI prefabs are located in the path below.

- Components were classified as buttons, frames, labels, popups, sliders and UI_etc and saved as prefabs.
- Each demo scene was saved as a prefab in DemoScene_Panels.

Double-click on the **"_PrefabsPanel_xx"** to view the screen of a collection of prefabs at a glance.
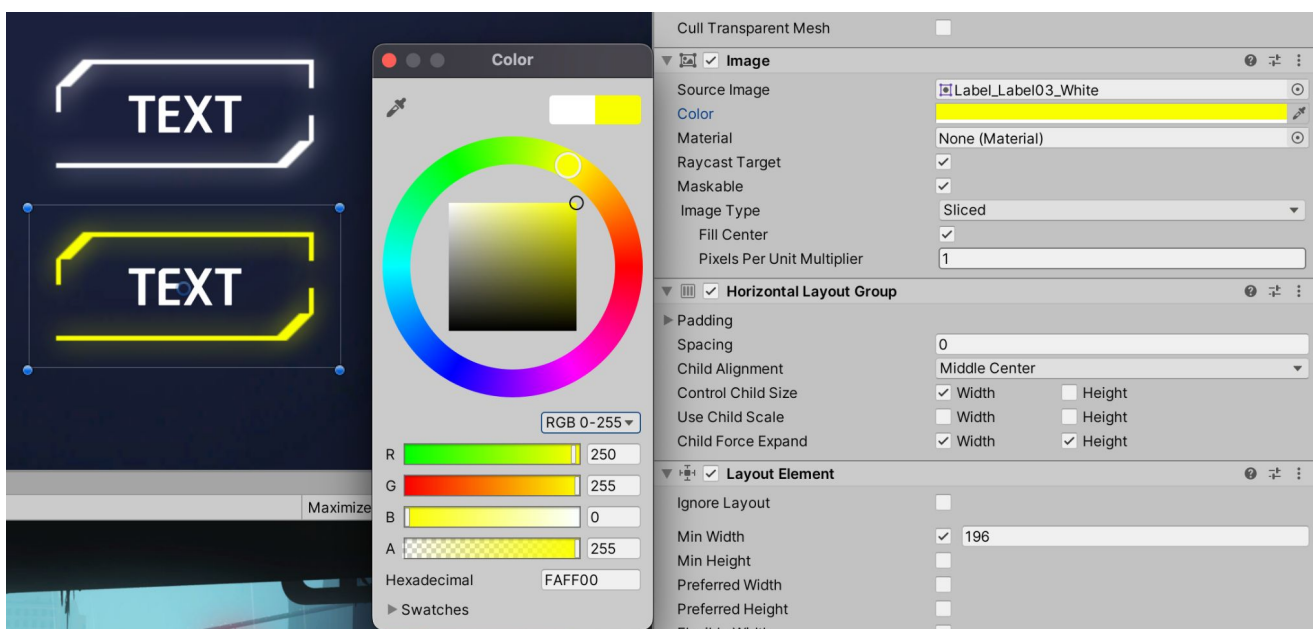

05 Prefabs White Elements

Component prefaps have **designated colors** and **customizable white versions** according to demo scenes.

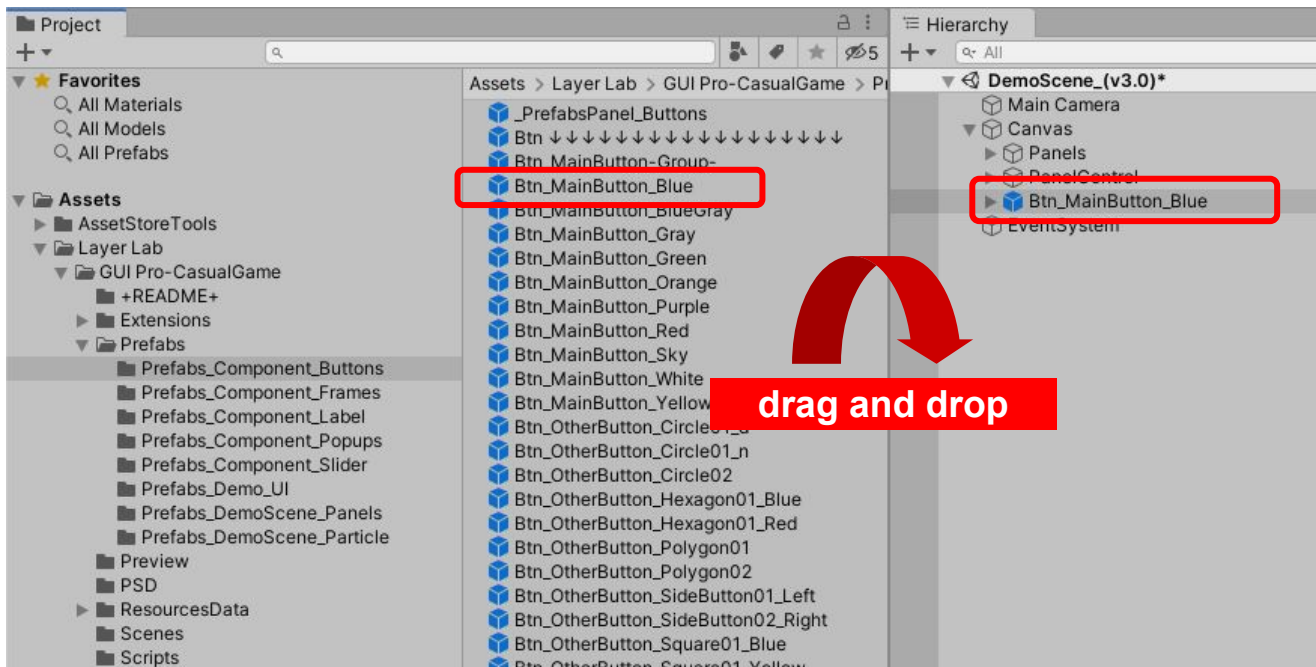

The **white prefabs** may be difficult to express the detailed design shown in the demo version, but it has the advantage of being able to customize the color directly from the engine.

## 1. Drag and drop Prefab to import into canvas of hierarchy.

drag and drop

2. Bring it to canvas and use unpack prepab.

This will keep the original. And modify it as you want and use it.

Right click > Unpack Prefab

07 Sprite 9-Patch

The Sprite elements except for some have been sliced and can be resized.

- Some designs only slice horizontally.
- 9-patch is not possible for complex gradation designs.
- Some elements have a minimum size depending on the design, such as tables, banners, and pop-up frames.
08 Sample Font

The sample font used in the demo scene is a free font. The copyright content may be changed by the font maker, so please check the current copyright content once more.

- The font used in the demo scene is '**NEXON Football Gothic**', and only English and Korean are supported.
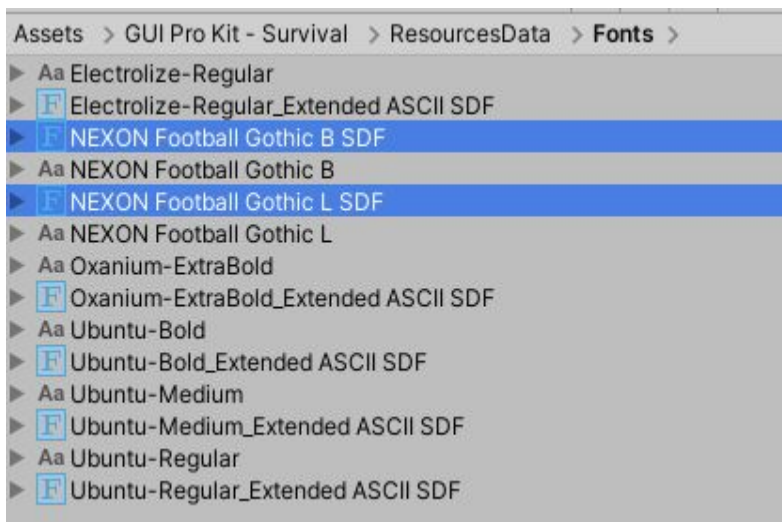

- The **"Ubuntu" font** included in the package **supports extended characters**.
- If you want to use a different language, please use a font that supports extended characters.

Q&A 1
To change the specified color of an element

Q. I want to change the designated color of the element.

**A. You can edit it in Photoshop. (Edit PSD)**

To modify the design and export the slice, you need to know how to use Photoshop.
It will be helpful to know the concept of layer and to learn how to use basic tools, how to use 'layer style', and how to 'export png'.
That way you can modify it to high quality, and you can do 9-slice as you like. And that will help you grow.

1) Easy way to change color

● Open the PNG in Photoshop and adjust it using 'Image > Adjustments ue Hue/Saturation'.
Q&A 1
To change the specified color of an element

- You can change the color of the element in a simple way.
- However, but you can't adjust it in detail or do a high-quality design, so please refer to it.
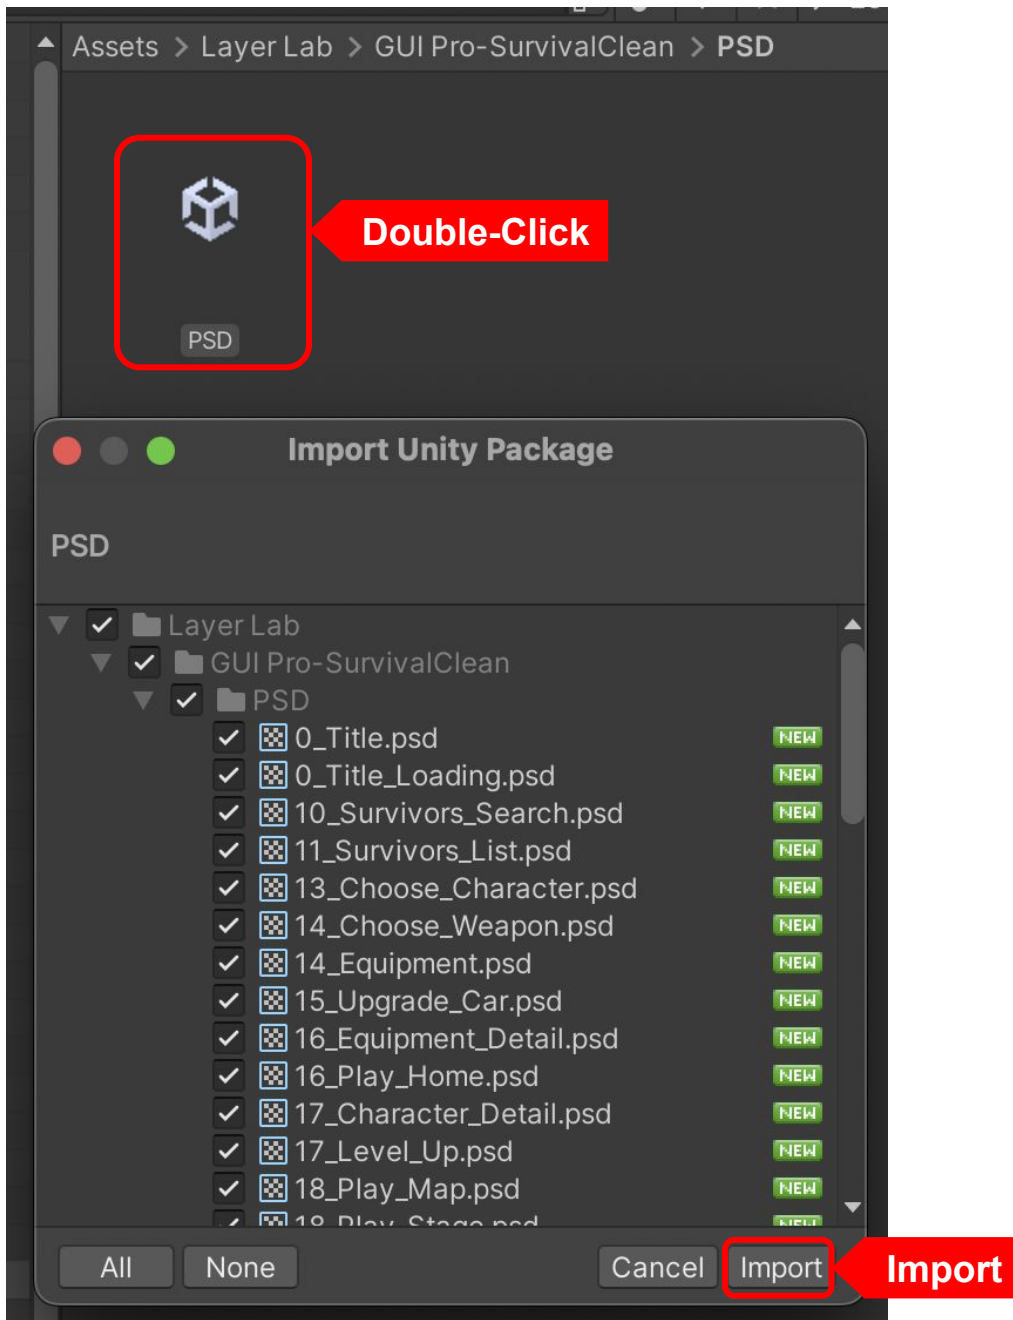

2) Export to PNG

- The simple way to store PNG(9-slice) is to 'Export' with 'Quick Export as PNG'.

(+PSD) Pack User Guide

PSD is packaged.

PSD files have been packaged to speed up import.

You can import a packaged file by Double-Clicking it.
